JURISDICTIONAL DETERMINATION U.S. Army Corps of Engineers

DISTRICT OFFICE: Kansas City District (CENWK)

AmerenUE Permit No. UE-32674-1-V

PROJECT LOCATION INFORMATION: Section 01, Township 39N, Range 16W

State: Missouri County: Camden

Center coordinates of site (Decidegrees): 92.62475 38.16720

Approximate size of area (parcel) reviewed, including uplands: <0.1 acres

Name of nearest waterway. Lake of the Ozarks

Name of watershed: Osage

JURISDICTIONAL.	DETERMINIA	TION
THE KINDIE LINDINAL	III I F KIVIINA	11010

Co	mpleted:	Desktop determination Site visit(s)	X	Date:	11/16/2006	(AmerenUE permit issued) (Corps only)
Jur	isdictional	Determination (JD):				
*	United Sta					be (or) there appear to be no "waters of the project site. A preliminary JD is not appealable
Ø	Approved JD – An approved JD is an appealable action (Reference 33 CFR part 331). Check all that apply					
	There are "navigable waters of the United States" (as defined by 33 CFR part 329 and associated guidance) within the reviewed area. Approximate size of jurisdictional area: <0.1 acres.					
	There are "waters of the United States" (as defined by 33 CFR part 328 and associated guidance) within the reviewed area. Approximate size of jurisdictional area: ≤0.1 acres.					
		The "isolated, non-navigable Decision supported Jurisdiction.				" within the reviewed area. Rule Information Sheet for Determination of No

BASIS OF JURISDICTIONAL DETERMINATION:

- A. Waters defined under 33 CFR part 329 as "navigable waters of the United States":
- The presence of waters that are subject to the ebb and flow of the tide and/or arc presently used, or have been used in the past, or may be susceptible for use to transport interstate or foreign commerce.
- B. Waters defined under 33 CFR part 328.3(a) as "waters of the United States":
- (1) The presence of waters, which are currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide.
 - (2) The presence of interstate waters including interstate wetlands¹.
 - (3) The presence of other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, the use, degradation or destruction of which could affect interstate commerce including any such waters (check all that apply):
 - (i) which are or could be used by interstate or foreign travelers for recreational or other purposes.
 - (ii) from which fish or shellfish are or could be taken and sold in interstate or foreign commerce.
- (iii) which are or could be used for industrial purposes by industries in interstate commerce.
- (4) Impoundments of waters otherwise defined as waters of the US.
- (5) The presence of a tributary to a water identified in (1) (4) above.
- (6) The presence of territorial seas,
 - (7) The presence of wetlands adjacent2 to other waters of the US, except for those wetlands adjacent to other wetlands.

Rationale for the Basis of Jurisdictional Determination (applies to any boxes checked above). If the jurisdictional water or wetland is not itself a navigable water of the United States, describe connection(s) to the downstream navigable waters. If B(1) or B(3) is used as the Basis of Jurisdiction, document navigability and/or interstate commerce connection (i.e., discuss site conditions, including why the waterbody is navigable and/or how the destruction of the waterbody could affect interstate or foreign commerce). If B(2, 4, 5 or 6) is used as the Basis of Jurisdiction, document the rationale used to make the determination. If B(7) is used as the Basis of Jurisdiction, document the rationale used to make adjacency determination: 1931 LO Navigational Determination.

Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (87 Manual) (i.e., occurrence of hydrophytic vegetation, hydric soils and wetland hydrology).

²The term "adjacent" means bordering, contiguous, or neighboring. Wetlands separated from other waters of the U.S. by man-made dikes or barriers, natural river borns, beach dunes, and the like are also adjacent.
